

CORE SEATING

CORE SEATING

Designed with the collaborative space in mind, the Core seating line is a natural complement to our Core Table series. It offers an extensive array of options to configure your space however best fits your needs.

Construction Specifications: Based on the similar principals as our Core Table the essence of this product starts with the steel under structure comprised of a 2"x 2" cold rolled steel unit welded into one solid piece to give this seating product the strength required to hold up over time. 1" thick laminated end panels are attached to the frame, and the top component is a 1" thick laminated top attached to the end panels and frame, but still keeping the 3/16" reveal on the sides.

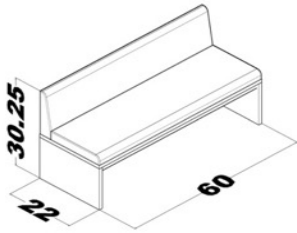

For seat and back cushions we use multi-density foam that is upholstered, the back for this unit is comprised of a wooden structure that slides over 1 1/4" steel tubes that are bolted to the frame.
