

# WEST END

## WEST END

With its rugged industrial look, the WEST END series table adds a new dimension to the parsons or community style table. Available in 30", 36" or 42" heights and lengths up to 120" as standard you have plenty of size options to choose from. Or if our standard dimensions don't quite work, we will make one to your specifications. Standard top options for this series are laminate or butcherblock, but we can also make your top in other materials like solid surface, veneer, stone, or other materials.

### **Table Pedestal Specifications:**

Finishes: Available in over 40+ standard powder coat finishes

### **Table Specifications:**

Construction: Each end base is made of two 2" x 2" steel uprights joined together by a 1.5"x1.5" joiner bar all welded together and comprised of 14 gauge cold rolled tube. At the top of the base is a 4"x 4" x 1/8" thick top plate to attach the base to your top.

For additional structural support all tables include a cross bar that attaches the lower portion of each base to one another.

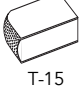

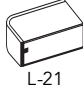

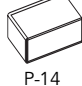

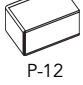

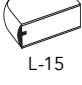

Overhang of tops: For tops up to 72" in length, there is a minimal overhang of approximately 6 inches from the base upright.

On an 84" top there is a 12" overhang, and on 96" tops there is a 18" overhang. 120" tops have 3 legs.

Table stiffeners are supplied where needed based on the length of the top and are included in the list price of the table.

Glides and Casters: All tables are equipped with leveling glides as standard, locking casters are available as an option.
